

# EFFECTS OF HIV AND TOBACCO SMOKING IN THE BRAIN

HELP US ADVANCE OUR UNDERSTANDING OF HOW HIV  
OR SMOKING AFFECTS THE BRAIN

## YOU MAY BE ELIGIBLE IF YOU:

- Are living with HIV  
**OR**  
Do not have HIV
- Do not currently smoke and have  
not smoked for the past 6 months  
**OR**  
Smoked daily in the past 30 days
- Are between age 18 and 75 years old
- Speak English
- Are able to complete an MRI scan

All Inquiries are welcome! Calling about the study does not oblige you to participate. If qualified, participants will be asked to complete a brain scan along with other study procedures.
